

Worksheet

Rail Freight Forward

Instructions:

Protecting the climate is urgently necessary. To draw the attention on that, the Rail Freight Forward coalition was formed. Rail Freight Forward is a coalition of rail freight companies that have set themselves the goal to drastically reduce the negative effects of mobility and freight traffic on our planet.

Answer the following questions on the video “Rail Freight Forward”:

1. Which transport challenges favour rail freight transport compared to road freight transport?
2. What are the advantages of rail freight compared to road freight?
3. How can a modal shift to rail transport be realised?

Time: max. 8 minutes
